Full-Stack Project User Stories
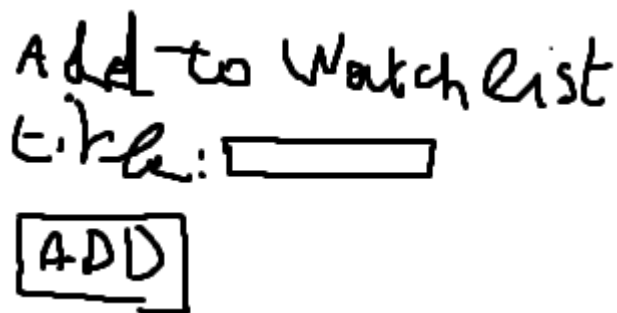

User Story 1: add a film to the watchlist

As a user

I'm able to add a film to my watchlist

So that I can keep track of films I still want to watch

Wireframe

Acceptance Criteria:

User can input a film title in a text field.

There is a button labeled "Add to Watchlist."

Upon clicking the button, the film is added to the watchlist.

The user should not be able to add the same film twice.

User Story 2: view watchlist

As a user

I'm able to view the films on my watchlist

So that I can know which films I still want to watch

Wireframe

Acceptance Criteria:

The watchlist displays all the films added by the user.

Each film is shown as a list item with its title.

The watchlist can be sorted ascending or descending on Title, Date added, Date released, Duration

User Story 3: remove a film from watchlist

As a user

I'm able to remove a film from my watchlist

So that I can keep the watchlist updated with films I still want to watch

Wireframe

Acceptance Criteria:

On right click on the film in the watchlist, a "Remove" button appears.

When the user clicks "Remove," the film is deleted from the watchlist.

The watchlist updates automatically after removal.

User Story 4: add a film review

As a user

I'm able to add a review for a film I've watched

So that I can document my opinion on the film

Wireframe

Add Film Review

title: ▭

review: ▭

s tars: ☆ ☆ ☆ ☆ ☆

Submit

Acceptance Criteria:

User can input the film title, write a review, and choose a star rating (1-5).

A button labelled "Submit" allows the user to save their review.

Title, review, and rating are required fields.

After submission, the review appears in the review list.

The same film can only be reviewed once by the same user.

If the user tries to review again an error pop-up appears.

User Story 5: view film reviews

As a user

I'm able to see a list of reviews for a film

So that I can read other users' opinions or my review

Wireframe

Acceptance Criteria:

All submitted reviews are displayed in a list view, sorted by the most recent.

The first review is the user's own review if applicable.

Each review includes the user's name, star rating (1-5), and review text.

User Story 6: edit a film review

As a user

I'm able to edit my film review

So that I can update my opinion if it changes

Wireframe

Acceptance Criteria:

On right click on the film in the review list, an "Edit" button appears.

Clicking the "Edit" button opens a form with the current review data pre-filled.

The user can update the film title, review, and rating.

After submitting the edited review, it updates in the review list.

User Story 7: delete a film review

As a user

I'm able to delete my film reviews

So that I can remove any reviews I no longer want to keep

Wireframe

Acceptance Criteria:

On right click on the film in the review list, an "Remove" button appears.

When the user clicks "Remove," the review is deleted from the review list.

The review list updates automatically after removal.

User Story 8: search for films by title

As a user

I'm able to search for films by title

So that I can quickly find reviews or films on my watchlist

Wireframe

Acceptance Criteria:

There is a search bar available on the main page and the watchlist page.

The user can input a film title, and the list updates with matching films.

If no films match, the user sees a message indicating no results were found.

User Story 9: personal review list

As a user

I'm able to view a list of all my own reviews

So that I can easily manage or revisit the films I have reviewed

Wireframe

Acceptance Criteria:

There is a "My Reviews" section or page where only the logged-in user's reviews are displayed.

All submitted reviews are displayed in a list view, sorted by the most recent.

Each review includes the film title, star rating (1-5), and review text.
